## How to Enjoy Your Dark Sky Experience

White light will impact night vision for you and those around you, and will take away from your experience. This includes cell phones, flashlights, and flash photography.

### ***If you are having trouble seeing, don't worry!***

Just allow 15-20 minutes for your eyes to adjust.

Red flashlights are also available to borrow at the Visitor Services desk.

\*Weather Dependent

Lowell Observatory is a smoke-free campus
